**Subject:** Leviathan Mine - RPM transition and q's

Hi Ron,

I'm working with Superfund management to identify a new Project Manager for the Leviathan site. During the transition, Gary Riley and I will continue to work to keep things moving at the site as best we can! I do have a list of items that I need your assistance or response to:

1. Given the timing of transitioning a new project manager to the site, I recommend delaying the Lean project until the new RPM has come up to speed. Would a delayed start for Lean be acceptable for the ARC team? What dates would you propose?
2. Are you my primary contact (during this transition)?
3. Lynda was coordinating a site tour with the Washoe Tribe leadership, RWQCB and Stakeholders for next week. The tribe has offered Oct. 2, 3, 9 or 10 as alternative dates for the tour. Do these days work for ARC/BP?
4. I will send a separate response to ARC's question of whether to proceed based on a conditional approval of July 20 re: Task Sampling and Analysis Plan (TSAP) for Bioaccessibility Testing related to the Final Baseline Human Health Risk Assessment.
5. We will be sending a consultation and clarification letter to the California SHPO, Nevada SHPO, and Washoe Tribe. We will coordinate that letter with you to ensure that it meets the needs of the proposed field work.

Thank you,

Dana
